PROFILE

- I am a polyglot Software Engineer and a results-driven technology leader with **9+ years** of experience in building pivotal products.
- I have **built, managed and mentored high-performance engineering teams** by setting sensible and effective Engineering processes.
- I have undertaken complex assignments, **collaborated with stakeholders** and have ensured on time deliveries.

EMPLOYMENT HISTORY

Engineering Manager, Funding Societies (Cardup)

Remote [Fintech,
Payments]

Oct 2020 — Present

CardUp was acquired by Funding Societies in 2022.

CardUp is a no-code platform which helps individuals and businesses improve cash flow, save time and automate finance processes.

- Managed the entire CardUp engineering **team of 12+**, comprising of Devs, QAs, and DevOps.
- Revamped CardUp's legacy codebase that slashed our **go-to-market timeline** by an impressive **50%** across SG, HK, and MY regions.
- Worked with PMs and cross-functional teams to build a strong product handling over **\$500 million** in domestic & overseas payments annually.
- Implemented **CI/CD** processes using GitHub Actions.
- Authored **CardUp's APIs** enabling Funding Societies to utilize them in their product offering

Engineering Manager, Weinvest

Bengaluru [Fintech]

Apr 2019 — Oct 2020

WeInvest is a robo-advisory platform that provided wealth management and investment solutions for individuals and financial institutions

- Began at Weinvest as a Tech Lead and later **promoted** to Engineering Manager, overseeing the Order Management Service (OMS) Squad.
- Enhanced performance of Weinvest's custom Robo-advisory app built for SCB Bank, Thailand by a **remarkable 70%**
- Introduced **observability** and monitoring stack in the org
- **Led a team of 6 to 8 engineers**, championing robust and efficient software engineering practices, and played a pivotal role in shaping product design, planning, talent acquisition, and mentoring throughout the organization.

Senior Engineer, Synup

Bengaluru [Marketing,
Sales]

May 2018 — Apr 2019

Synup offers marketing and reputation management solutions to help businesses manage their online presence across various directories and platforms.

- Responsible for building and maintaining multiple **micro-services** like Online Listings Engine, Notifications Engine
- Involved in complex re-architecture of the entire platform for moving from a **monolith to multiple micro services**

Software Engineer , Flock Software

Bengaluru [Human Resources]

Feb 2016 — May 2018

- Architected the Flock platform to robustly accommodate critical business scenarios, such as integrating HelloSign's API and supporting multi-tenancy

Software Engineer, Cerner

Kansas City [Healthcare]

Jan 2015 — Feb 2016

- Worked as part of the Appointments Scheduling team

EDUCATION

MS Computer Science, University of Buffalo SUNY

2013 — 2014
